INSTALLATION

STEP 1

Assemble the lamp body

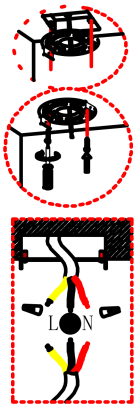

Find the lamp body (A) and the branches (B). Fit each branch to the body, align the holes and tighten the screws. Straighten the lamp-holder hoses so every socket points the right way.

STEP 2

Mount the canopy

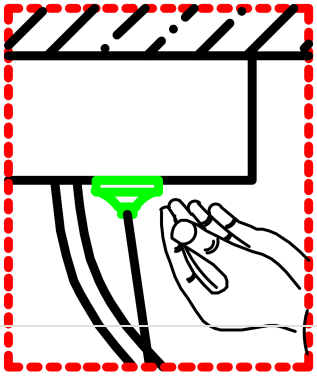

Turn off the power at the circuit breaker. Fix the mounting plate to the ceiling junction box, connect the house supply to the fixture wires (live to live, neutral to neutral, ground to ground) and secure the canopy.

STEP 3

Adjust the height

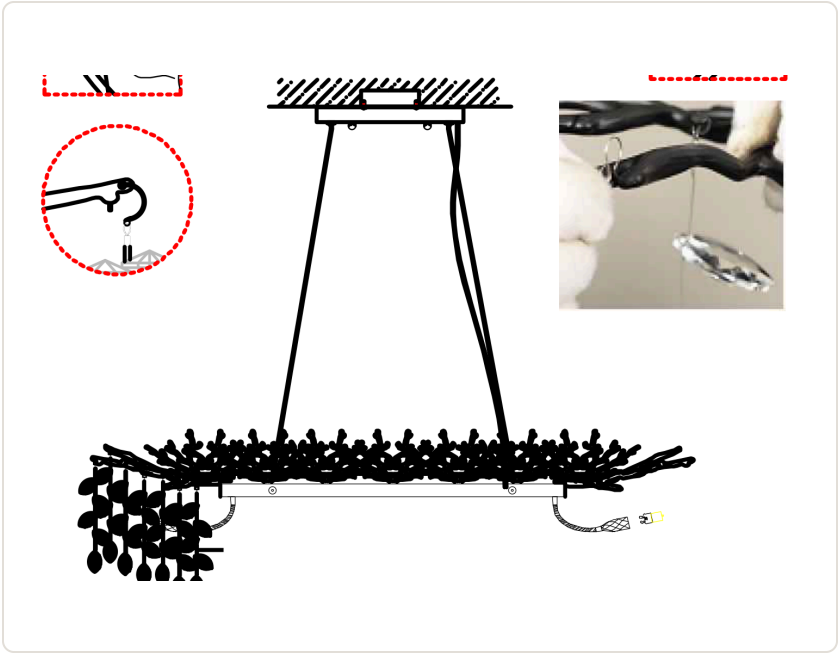

Press the small pin on the canopy to release the cables and set the fixture to the height you want, then let go to lock it.

STEP 4

Fit the bulbs and crystals

Insert the G9 bulbs into the lamp holders. Hook the crystal strands (C) into the holes on each branch, 7 per branch. Spare strands are not needed. Restore power and switch on to test.
